Professional Summary

Junior Full-Stack Developer with 2 years of hands-on experience designing and maintaining secure, scalable web applications using **Laravel, Vue.js, and PostgreSQL**. Proven experience in building **HR systems and device-tracking platforms** that support business operations. Committed to writing clean, maintainable code and delivering solutions that improve **efficiency and usability**.

Work Experience and Key Projects

Web Developer: Trailblazers Solutions Inc. (Formerly known as PVGI) – Cubao, Arayat | February 2024 – Present

HRMS – Human Resource Management System

- Designed and implemented a customized HRMS using **Laravel**, tailored to customer requirements and currently used by over 100 employees. The system allows HR departments to manage employee data, attendance, leave requests, overtime, undertime, and official business (OB). Integrated role-based access control to ensure secure, efficient record management, and delivered a user-friendly interface for smooth interaction across departments.

Company Website with CMS

- Designed and implemented a company website using **Vue.js for the frontend** and **Laravel with JWT authentication for the backend.** The site features event and news posting, as well as secure login access for staff. Deployed to the cloud using Laravel Forge and Digital Ocean, ensuring scalability, security, and performance.

Huawei Cloud API integration System

- Developed and implemented a Huawei Cloud API integration using **Laravel (Sanctum)** and **Vue.js + Tailwind CSS** to fetch and analyze raw network data, including AP user logs, per-site device usage, and uptime/downtime metrics
- Implement reporting with exportable datasets for operational insights on uptime/downtime and device performance

Education

Quezon City University (2020 – 2024)

Bachelor of Science in Information Technology: Receiver of Quezon City University Scholarship

Technical Skills:
